

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: March 20, 2008

Water Body Under Evaluation:

Water Body ID #: 0217
Name: Peruque Creek (Class P)
Length of Segment: 4.0 miles
County(ies): St. Charles

Use Attainability Analysis (UAA) Study:

UAA ID #: 0589
Submitter: Pickett Ray & Silver, Inc.
Date(s) Conducted: May 15, 2007
Date Received: June 5, 2007
Use Evaluated: Secondary Contact Recreation (SCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: No UAA was conducted on this segment (WBID 217), which is a class P stream and is already listed for Whole Body Contact Recreation in the November 30, 2005 Water Quality Standards. However, a UAA survey was conducted on WBID 0218 in May 2007. Site #6, which is downstream of segment 218 on WBID 217, was mistakenly included. The UAA on WBID 218 noted footpaths/prints and fishing tackle at site #6.

Is the evaluated use attainable? ☐ Yes ☐ No

Comments: Due to evidence of secondary contact (paths and fishing tackle), the committee recommends the Secondary Contact Recreation use be assigned.

Committee Recommendation:

- ☒ Add Use ☐ Retain Use ☐ Remove Use
- ☐ Modify Use ☐ Inconclusive
